Welcome

Thank you for considering VizioGlazz Fabrications. We fabricate and install architectural glass for homes, offices, shops and hotels, and we do it with one team from the first measurement to the final clean.

This catalogue shows what we make, how we work and the options you can choose from. If you cannot find what you need, ask us. Most of what we build is made to order.

About us

Who we are

VizioGlazz Fabrications is a glass fabrication and installation company based in Tema, Greater Accra. We measure, make and fit glass work for homes and businesses.

Our mission

To fabricate and install quality glass products on time, with honest quotes, safe working practices and finishing we are proud to hand over.

Built around precision

- **One team.** We survey, fabricate and install, so one crew is accountable for the result.
- **Made to measure.** Every opening is measured on site. Nothing is forced to fit.
- **Safety first.** Toughened and laminated safety glass, and safe working practices on site.
- **Quality hardware.** Smooth rollers, solid hinges and secure locks that last.
- **Clear communication.** Honest quotes and quick replies by phone and WhatsApp.

Curtain Wall Installation

A curtain wall is a non structural glass skin that hangs from the building frame. It keeps weather out, lets daylight in and gives a building a sharp, modern face.

Includes

- Site survey and facade measurements
- Aluminium mullion and transom framing
- Single or double glazed panels
- Tinted, reflective or clear glass options
- Weather sealing and drainage detailing

Ideal for: office blocks and corporate headquarters, showrooms and car dealerships, hotels, banks and retail centres.

Office Partition Installation

Glass partitions give meeting rooms and private offices their own space without closing off the floor. Light travels through, teams stay visible and the office feels larger.

Includes

- Layout planning with your floor plan
- Framed and frameless glass partition walls
- Swing and sliding glass doors
- Frosted, etched or branded glass film
- Floor and ceiling channel fixing

Ideal for: corporate and open plan offices, meeting rooms and boardrooms, clinics and reception areas.

Shop Front Door Installation

Your shop front is the first thing customers see. A clear glass entrance shows your products, invites people in and gives your business a confident look from the street.

Includes

- Shop front glazing and framing
- Single and double entrance doors
- Toughened safety glass
- Floor springs, patch fittings and pull handles
- Security locks

Ideal for: retail shops and boutiques, pharmacies and supermarkets, restaurants and cafes.

Skylight Installation

A skylight lights rooms from above, which is especially useful for corridors, stairwells and interior rooms that never get a window.

Includes

- Roof opening survey and measurements
- Fixed and opening skylights
- Laminated or toughened roof glass
- Tinted and low heat gain options
- Waterproof flashing and sealing

Ideal for: homes and villas, stairwells and corridors, kitchens and bathrooms.

Window Installation

Good windows control light, airflow, noise and security. We fabricate aluminium and glass windows in the style and size your building needs, and fit them straight and sealed.

Includes

- Sliding, casement, awning and fixed windows
- Aluminium frames in a range of finishes
- Clear, tinted, frosted and laminated glass
- Mosquito mesh and burglar proofing on request
- Sealing and weather strips

Ideal for: new homes and apartments, window replacement and upgrades, offices and schools.

Door Installation

Glass doors connect rooms and open buildings up to patios and gardens. We fabricate swing, sliding and folding glass doors and finish them with solid, smooth running hardware.

Includes

- Sliding and swing glass doors
- Toughened and laminated glass
- Aluminium and frameless door styles
- Rollers, hinges, handles and locks
- Patio and balcony door systems

Ideal for: patios, balconies and gardens, living rooms and bedrooms, offices and meeting rooms.

Glass Railing Installation

Glass railings keep the view open while keeping people safe. They suit balconies, staircases, terraces and mezzanines, and they look good in both modern and classic buildings.

Includes

- Balcony, terrace and stair balustrades
- Framed, post and frameless systems
- Toughened and laminated safety glass
- Stainless steel posts and handrails
- Secure fixing to slab or wall

Ideal for: balconies and terraces, staircases and landings, pools and rooftop decks.

Shower Cubicle Installation

A glass shower cubicle keeps water where it belongs and makes the bathroom look larger and cleaner. We make enclosures in many shapes, from simple corner units to walk in screens.

Includes

- Corner, quadrant, square and walk in layouts
- Frameless and semi frameless designs
- Sliding and hinged shower doors
- Toughened clear, frosted or tinted glass
- Chrome and matte black hardware

Ideal for: home bathrooms and en suites, hotels and guest houses, apartments and rentals.

Options

Glass types

We help you choose the right glass for safety, privacy, heat and noise.

Clear glass

Maximum light and a neutral look.

Toughened glass

Heat treated for strength. Breaks into small safe pieces.

Laminated glass

Two layers bonded together. Holds together when broken.

Tinted glass

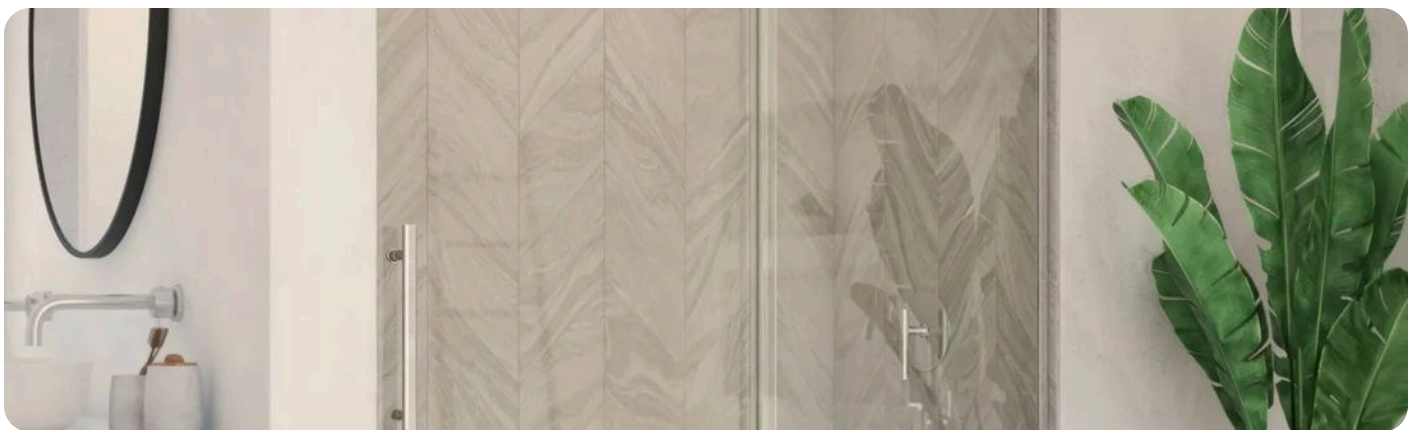

Reduces glare and solar heat.

Frosted and etched

Privacy with soft light for showers and offices.

Double glazed units

Two panes with a gap for better heat and sound control.

Options

Finishes

Frame and hardware finishes vary by product. Ask us what is currently available.

Matte black

Anodised silver

Bronze

White

Chrome

Brushed steel

How we work

- **Site survey.** We visit, measure every opening and talk through your ideas, budget and timeline.
- **Design and quote.** You get a clear quote with the glass type, frame finish and hardware we recommend.
- **Fabrication.** Frames and glass are cut, toughened and prepared to your exact measurements.
- **Installation and handover.** Our team installs, seals, tests and cleans, then walks you through the finished work.

Let us build it in glass
